# ULTRA LIGHT WEIGHT SUPER RESILIENT

NEW TECHNOLOGY

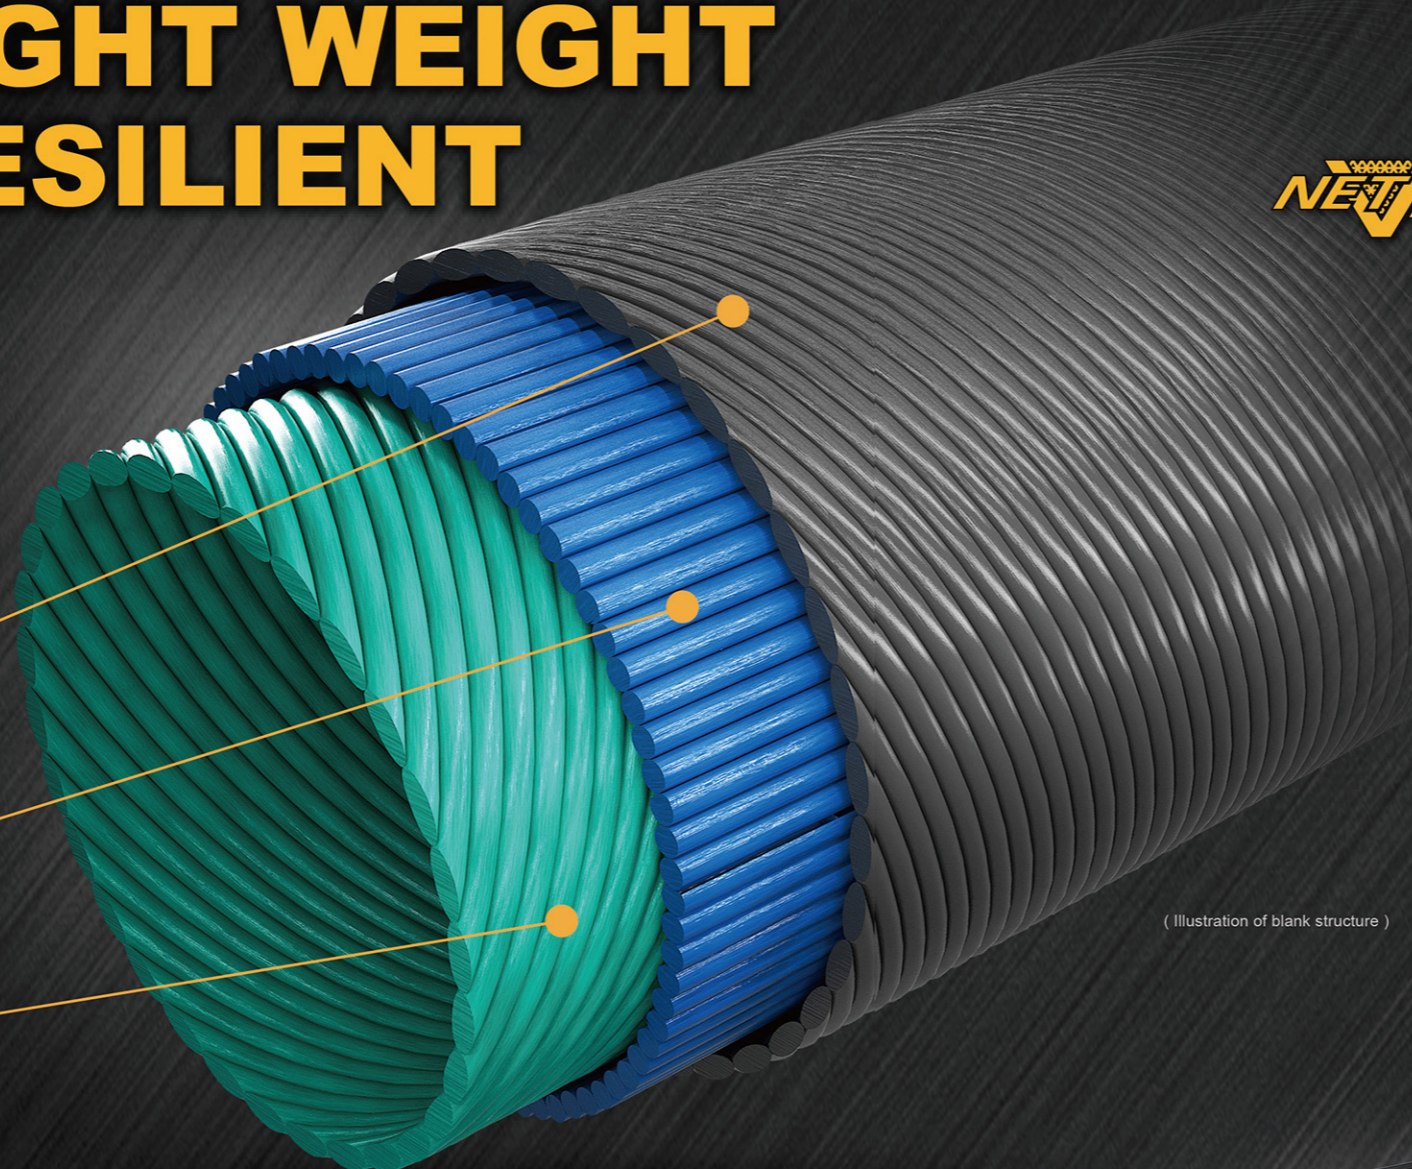

## NET-V III

【 Outer layer 】  
Slanted carbon fiber

【 Middle layer 】  
Vertical carbon fiber

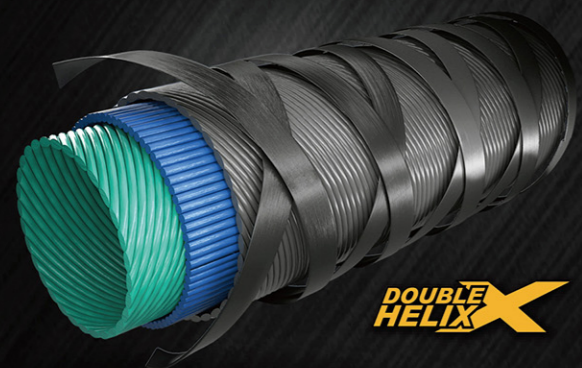

【 Inner layer 】  
Reversed slanted carbon fiber

( Illustration of blank structure )

### Being strength and light weight from the inside core

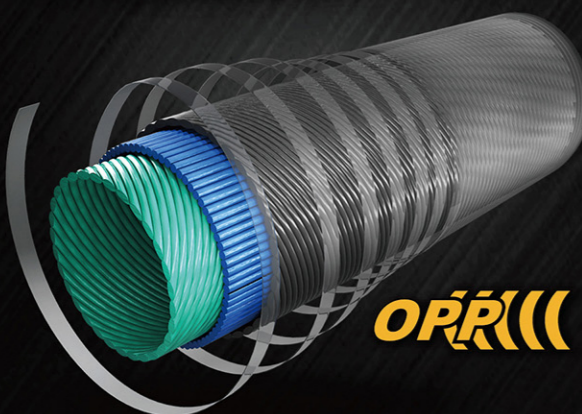

Maximize its rigidity based on the lightest treble blank structure. Improved upon the previous generation of NET-V net-shape carbon structure technology, after continuous engineering and developing, we finally achieved mastery of integrating new technology and materials into our unique and latest NET-V III technology. Adopted treble carbon fiber layers with different slanted directions construction for every joints to maximize its performance. This idea of “no-seam-style” fishing rods makes it be on the top no matter for its capabilities or weight. This is what we are proud of!

### DOUBLE HELIX - X

Strengthen the blank structure, the beginning of a new epoch.

With double helix X-shape method, makes the rod blank sturdier, steadier and increases extra 20% on its resilience and reacting force than normal by its double power beef up efforts. Let its users easy to bring its power into full play no matter in casting accuracy or struggling with big fish.

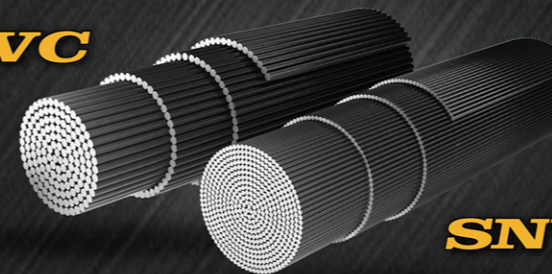

### OPP

Achieved light weight, strengthen, scratch-resistant and water-repellent features.

Without traditional coating and grinding procedures, this OPP technology can achieve matt surface finished rod without damage the rod surface, which allows it to keep its strength. Except for that, in addition to its unique characteristics makes it being water-repellent, also the matt surface finished rods are scratch-resistant, a slight scratch will not leave a scar on it.

### NVC

### SNVC

### NVC / SNVC

High-density reinforced carbon fiber material  
Achieves the ideal of being lighter, stronger, and more resilient

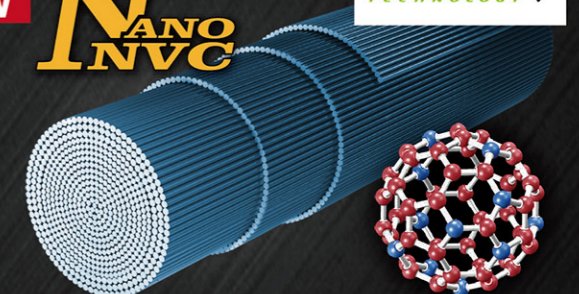

Add small amount resin into carbon material to make the rod not only keep its resilience but also increase its elasticity and flexibility.

Use hot-pressure method to decrease as much resin as possible to create a high density carbon material with thinner and light weight features.

NEW

### NANO NVC

### NANO NVC

Ultra-high-density nanocarbon fiber material  
Realizes exceptional performance in terms of ultra-lightweight and ultra-strength

NANO NVC is made from high polymers nanostructure resin. Compare to SNVC technology, the new NANO NVC technology allow us to create a less resin and greater density carbonfiber blank. In order to achieve ultralight weight, powerful and dramatic slim blank.

The present carbon material has entered into its highest level and has been close to its limit of the balance between light weight and power. However, HR still keep studying and engineering on rod materials every year, trying to make it better. Use the lowest resin and highest carbon material to create high modulus carbon material (SNVC) to produce rods with best resilience and lightness.

.. SLOW JIGGING IV

.. SLOW JIGGING III SG x TOKAYO

.. SLOW JIGGING III SE x TOKAYO

## Slow Jigging IV

SLOW JIGGING IV is made of the latest HEARTY RISE construction method [NET-V III] structural technology. The rod is made of Japan's latest high-strength and high-elasticity TORAYCA "T1100G" ultra-high-density nanocarbon fiber material, combined with TORAYCA M40X high-elastic carbon fiber material. It not only achieves to improve high strength and high elasticity but also can reduce more weight. These make SLOW JIGGING IV series are the slow jigging rods which combined with ultra-high strength and delicacy feeling. It allows anglers to shake the bait easily with fineness to perform a subtle movement of attracting fish. It also has extremely strong reaction to reduce the operator's burden when facing high-intensity fish species. SLOW JIGGING IV uses Japan's FUJI's latest titanium frame TORZITE guide ring, which greatly improves the weight and reduces the friction of the line. In addition, the rod is fully reinforced and wrapped with four-axis so that the rod will not have unnecessary shaking. It can be perfectly presented in every swinging and controlling the rod.

## Slow Jigging III SG x TOKAYO

The blank is made of powerful, flexible, and high-density nano carbon fiber material from Japan. It is a fishing rod with flexible action, with great power. While bending, you can fight against the big fish while using it. The FUJI T-DPS reel seat allows the rod to amplify the sensitiveness and can know better about the dynamic of the bait and prey. The rod is attached with FUJI LC-SIC guide, with powerful tangle-proof LC guides and SIC guides.

## Slow Jigging III SE x TOKAYO

The whole rod is made with high quality nano carbon fiber, which is super light and elastic, making it easy to use with great sensitivity. As for the casting version, it has a FUJI T-DPS reel seat, which maximize the signal from the tip to the handle, making it easy to feel the motion of the jig and target. As for the spinning version, it has a FUJI DPS reel seat, which provides great feeling on hand and easy to feel the signal of the jig and target. This series has all applied with Japan FUJI K series ALCONITE guides.

## Slow Jigging III S x TOKAYO

HEARTY RISE SLOW JIGGING, one of our most classic saltwater series, we present you our new "SLOW JIGGING III S", 5' 8 length with more power than the previous version, the weight is also lighter to make the handling more perfect, also when dealing with gigantic fish it has great resilience to help you catch the fish easily, we also invited tester AKA from Malaysia and tester HIDE from Taiwan to test and adjust it several times, and eventually we proudly present you the beautiful "SLOW JIGGING III S".

## Slow Jigging III R x TOKAYO

SLOW JIGGING has evolved into several techniques, by using certain techniques anglers can catch certain species precisely. SLOW JIGGING III R is designed base on these techniques, this time we have add model 00 into the series for anglers who like to use lighter lures, also we not only have spinning rod models, but also added casting rod models for more anglers in need, to make it a more interesting experience using SLOW JIGGING III R, with so many special models it would be more interesting for you to join our SLOW JIGGING family.

## Slow Jigging III

HR SLOW JIGGING III, the Slow Jigging specialist, is made by HEARTY RISE newest NET-V III technology. The blank was built by the newest high density TORAYCA "T1100G" NANO carbon material to bring up its strength and resilience to the top, which makes SLOW JIGGING III to be a rod features with high strength and ultra sensitive, it is a premium rod designed for Slow Jigging. The high sensitive achieves the delicate motivation of the jig; the great resiliency makes fewer burdens to the physical. It can target to the bigger size of migrated species and the beneath species. This HR SLOW JIGGING III equipped with FUJI latest TITANIUM TORZITE guides to make it lighter and lower the abrasion of the line. Besides, this rod is excellent in resilience and bending curve performance. We have adopted DOUBLE HELIX-X technique to strengthen the blank in order to prevent from over-wavering, make it always keep perfect performance.

BLACK DIAMOND II

NEW DEEP BLUE for Light Jigging

NEW DEEP BLUE for Jigging

## Black Diamond II

HEARTY RISE CUSTOM SALTWATER ROD

BLACK DIAMOND II The new evolution of powerful performance, utilizing the NET-V III blank with Double Helix-X Enhanced carbon belt technology, making it thin, smooth, and strong while operating. Operating the bait at a fast pace with a strong blank. In this way, it will reduce the tiredness of anglers. Using the strong return force, the rod can bear a lot of pressure while fighting the fish and bend a lot. The new jigging rod series is for anglers that are in the chase of the ultimate jigging experience.

## DEEP BLUE

HEARTY RISE OFFSHORE GAME Light Jigging Model

This new force of HR light jigging rods is adopt with NET-V III technology and SNVC technology to create a cost-effective light jigging rod with resiliency, operation, strength and light in weight features. It can be used with multiple fishing methods and makes the lure swim naturally, but still be strong enough to fight with all kind of species with its slim and light rod blank.

## DEEP BLUE

HEARTY RISE OFFSHORE GAME Jigging Model

This new series adopt the latest construction technology the NET-V III to build a new force for HR jigging rods. It's a cost-effective jigging rod with resiliency, operation, strength and light in weight features. The whole series is made of SNVC carbon fiber material and the perfect balance of carbon and resin makes the blank be strong but be light in weight. It is strong enough to fight with migratory species and decreases the chance of unhook, and its lightness won't make you be exhausted after fishing all day long.

## PINK BLADE

The pursuit of light and sensitivity. PINK BLADE is a jigging rod focusing on anglers who like to capture big fish with thin fishing braids. The whole rod blank is made of NET-V III technology and SNVC high-density carbon fiber material. The one-and-a-half pc design provides great strength and convenience. The Japanese FUJI reel seat has an ergonomic design that provides great comfort ness. The FUJI guide provides smoothness while you are casting. The high strength, great sensitiveness, and outstanding performance can definitely satisfy and meet your expectations.

## Blue Ocean

HEARTY RISE CUSTOM SLOW JIGGING ROD Slow Jigging Model

A new series of Slow Jigging rods for you to control the jig easily! It is designed with 6' 7" in length and it can bend perfectly but with great resilience, these features allow you to operate the jig in several different kinds of activities and let the jig swims in a wider-range, it is your perfect match to target the benthic or migratory species! Welcome to feel HR BLUE OCEAN Slow Jigging rods by yourself!

## INNOVATION

HEARTY RISE CUSTOM SALTWATER EGI ROD

HR top class fishing rod, INNOVATION has gathered the HR latest technology. Going for the lightness and sensitiveness. In order to do so, we input the latest NET-V III technology. The multi-angle mesh technology while using carbon nano blank. The handle we have is EVA detachable handle, which carries out the light and sensitivity. Except for this, we utilize OPP cosmetics for the coating to provide great power and durability. It is anti-scratch and splash-proof at the same time.

NEW GYOLUCK

SLASH WAVE

ROCK MASTER

SHIGA

# GYOLUCK

A new standard of boat lure rods! Looking for the perfect balance between strength and esthetics, makes it powerful but flexible still. No matter for casting, operating or fighting with the prey, anglers can control the rod with ease and bring its power into full play. Made of Japan-made high modulus carbon fiber cloth and covered it with carbon fiber crossed in X-shape to strengthen the body to prevent over-swaying. In the struggling condition, it can make unremittingly efforts to its maximum with its great elasticity. Whole series is designed in 1.5-piece and outfitted with FUJI reel seat, FUJI tangle-free designed K-SIC guide.

# Rock Master

Rock Master, the rod for catching rockfish, using solid tip connected with a tubular design, making the hand feeling great when using light jig, the orange dot on tip increase the visibility, making it possible to set hook even the signal is really weak. By using high density carbon fiber from TORAY in Japan, and by using HR NET-V III technology, making the bending smooth between sections, the OPP tape wrap on the whole rod protect it from scratch, the FUJI K GUIDES make it smooth for casting, the seat is FUJI IPS combine with EVA, which is light and good hand feeling, overall it's a detailed piece of work.

# Shiga

The TENYA boat fishing rod for beltfish. The solid rod tip that emphasizes sensitivity can be clearly grasped even with very small fish signals. The NET-V III body structure technology and SNVC ultra-high-density carbon fiber material show the perfect combination of high strength and operability. The one and a half section design that makes it portable and does not degrade its performance. No matter where time or place, fishermen can enjoy fishing and catch the beltfish in high-efficiency with this TENYA rod.

# SKYWALKER

TRAVEL ROD SERIES THAT EASY TO CARRY

A series of travel fishing rods that can conquer the world, universal design without borders. This fishing rod is made of NET-V III structural technology and SNVC high-density reinforced carbon fiber. This is an unreserved design that pursues the highest level of performance. This high-end design allows you to bring it out of country, and you won't feel the number of the rod sections. And its toughness and operability allow you to demonstrate high-performance fishing wherever you go. This SKYWALKER travel rod allows you to travel the world with unlimited possibilities, and it is the best choice of Lure fishing rod for you to conquer the world.

VALLEY HUNTER II VH2C

VALLEY HUNTER II VH2S

EVOLUTION III

Slash Monster

## Valley Hunter II NEW

EXCITEMENT APPROACHING SYSTEM

Retaining the robust performance and versatility of the first generation, Valley Hunter II utilizes TORAY T1100G and M40X carbon fabrics, ultra-high-density carbon fiber materials. Through a blend of weaving, it achieves high strength and elasticity, allowing the fishing rod to maintain a certain degree of flexibility while possessing high tensile and impact resistance capabilities. This enables it to cope with powerful bursts and accommodate diverse fishing setups, enhancing sensitivity and adaptability to various fishing techniques. The guide rings adopt Fuji SIC series, combining strength and durability. Valley Hunter II is suitable for all lure fishing techniques and can adapt to all fishing grounds, elevating the practical requirements of each fishing technique. It embodies three key features: high sensitivity, high strength, and high elasticity. Whether it's Holland's crap, pearl grouper, bass, barred flagtail, or vigorous fish like snakehead or peacock cichlid, they all have corresponding specifications. It's also suitable for saltwater. Additionally, Valley Hunter II's casting handle grip features an internally embedded spring-loaded full-reinforcement clamp, effectively locking the line roller. With a smaller hook grip and ergonomic design, it enhances balance and reduces fatigue. The hollow design increases contact surface to improve sensitivity. Its unique design is irresistible, providing comfort and ease for both powerful casting and intricate maneuvers. From leisure to competitive fishing, the brand-new tactile sensation of Valley Hunter II will surely leave you amazed, continuing to impress.

## EVOLUTION III

Compilation of experience

This series is the heritage of the "EVOLUTION". Unique charisma, combining high sensitivity, ultra-light and excellent operability. The blanks is made of Japan's high-density reinforced carbon fiber then weave by NET-V III(multi-angles net-shape tech) which is the most advanced technology of HR. Regarding to the appearance design it is applied with OPP technology, makes it be light, be water-repellent and also be anti-scratching. The whole series have tough structure, and uses Fuji Fazlite K Series guides and Fuji Reel Seat to seal the deal with this rod. Fusion every merit above to make this amazing rod. Whatever distance casting or lure operating, this rod can achieve all of your demands.

## Slash Monster

Slash Monster is a travel rod able to catch big monster fish, with Slash Monster you can travel and fish wherever you want, whether at river, lake, or even ocean it's capable of many situations. The blank is responsive and has great usability, also it has great performance and hand feeling, which make it easy to jig and face big monster fish, also it's able to perform various kind of techniques for big game. With dark painting and simple design that has great usability, it definitely would fulfill your expectation.

## DARK SOULS

The next level of freshwater fishing rod, the beauty of power and softness, it's really easy to use for casting, jigging and fish fighting, it's an outstanding rod in all aspects.

The blank was built with Hearty Rise NET-V III multi-angle net structure technology with high quality carbon fiber from japan, the OPP tape wrapped on it prevent from scratching and make it durable, all models has strong blank with FUJI seats and anti-wrap K guides. With great strength and resiliency make it easy for fish fighting.

## Black Force

All Round Classic Series

Comprehensive adopting the new tech of NET-V II (high-density multi-angles net-shape tech), the strength and toughness is higher 15% than before, especially the rod's belly. And the rod is made of SNVC super-strong carbon fiber to make the rod have ultra-light, great hand-feeling and high-sensitivity. The rod adopting the high-stability reel-seat and make it feels more quality. Then applied the Fuji K Guide which can prevent the line tangling and have abrasion resistance. Black paint for this cool rod, and the grip adopting the charm black EVA, Non-slip, durable. It's totally suitable for the dream of Angler.

## Mad Attack

Burliness and light, making everything easy. The wide usage is also very attractive. Mad attack has three important elements. Burliness, light, and long. Which is based on the qualities: Slim, Smooth, and Strong. So it can have all kinds of battle with big fish fluently and in ease. Due to its wide usage, it is very popular among many fishermen, which makes it the number one pick light equipment for battling with big fish.

## HR TACHIJO JIG **NEW**

This design is intended to mimic the appearance of a white croaker, fooling predatory fish into mistaking it for a real fast-falling swimming posture of a white croaker. It can be effortlessly manipulated with a light shaking motion, resulting in a natural fish-attracting effect. It is also suitable for the slow jiggling method, where a large swing of the lure entices larger fish to prey on it as the iron plate falls horizontally. This iron plate is specifically designed as the ultimate weapon for catching sea bass, and it is suitable for use from autumn to winter, exercising powerful attraction to any migratory fish species.

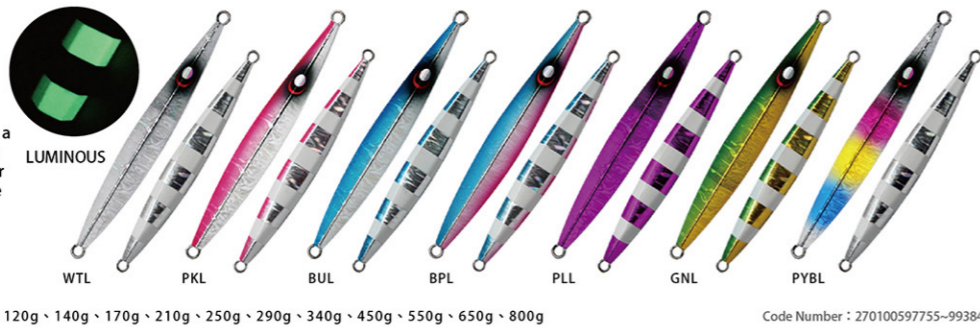

## HR SLOW DEEP III JIG

SLOW DEEP is a jig series developed for strong flows and deepwater regions. The whole cosmetic design is thin and long, the flat truncation design allows the jig to own a stable swimming form while jerking the jig. The triangle cosmetic design allows the jig not to be affected by the flow while sinking in the water, and increases the dropping rate. The groove design at the back gives the jig high stability while reeling it in. It can also suppress the unstable swimming form and gives it a good crosswise moving ability. This is very effective to prey in the deep water. And can target those species that normal jigs can't accomplish.

## HR SITENKIBA III JIG

Continuing the superior performance of the SITENKIBA series, we designed this SITENKIBA III which fisherman can accurately drop it to the designated location in the deep waters. It is also a strong attraction for benthic fish. Combining the 1st and 2nd generation we adjust it to a narrower shape, which can reduce resistance when the line is closed, so it is more stable and not drifting when it slides down. It is an excellent weapon to challenge deep waters.

## FEV MARS JIG **fev**

FEV MARS JIG is designed for targeting the benthic or migratory species with its short shape. It is easy to operate or control the movement to attract the fish to hit. The special center-of-gravity position allows it to perform the best turning motion and prevent from over-turning.

## HR SLASH WAVE POPPER 160F **NEW**

The popper that's design to catch big monster, with great weight design and low wind resistance, it has great castability, the action is also versatile, when doing small jerk it swim like pencil, when doing slow retrieve it has nice sway, 160mm size is good for fish to bite, with so many advantage, it is much easier to target the fish and have bigger chance to bite.

## HR SLASH WAVE MINNOW 170S **NEW**

170SP is a minnow design for shore casting to catch big fish, the weight transfer design make it easy to cast even against the wind, the size is good to bite and durable to use, the action is versatile, whether steady retrieve or jerk retrieve has really good effect, you must give it a try.

## HR VALLEY HUNTER PENCIL 65/85

Water surface lure with long casting range and great action. With Z path swimming action that splash water, and also with the steel ball inside it that make a lot of noise, it seems like fish that want to flee which stimulate predators to attack. The streamlined shape makes it able to be cast with low air pressure for longer range. To sum up, it's a lure that is easy to use and effective whether it's at wide lake or rapid stream.

## HR VALLEY HUNTER MINNOW 55SS

It has tight wobbling action, can stably moving forward in fast water flow, which is good to use for offshore or fast stream in valley, and suitable for big lake, too. 55mm size that is easy for fish to bite, can be used at all season, you must give it a try.

## HR VALLEY HUNTER VIB 46S-HS

It is best for freshwater, or saltwater at every water level. It can imitate the escaping fish, which can wiggle in the water. The weight inside it can stable the bait after dropping into the water and can avoid being tangled or weird swimming forms. It is definitely the best lure bait for fresh-water and salt-water.

## HR VALLEY HUNTER MINNOW 60F

This big waving movement, stable swim form, and high avoiding rate. It is suitable for torrents and big lakes. It is most suitable for fish at the size of 60mm. It is suitable for all four seasons and is a necessary bait to have.

## HR VALLEY HUNTER POPPER 60

POP mainly attracts its target by sound. The big sound and the big splash, you are able to hear it very far away. The movement is limited because of the open mouth, so the moving distance will be shorter, but makes it easier for fish to target and attack, it can also increase the hit rate. You can use it in torrents, slow flows, reservoirs, or lakes.

## HR VALLEY HUNTER HUMP MINNOW 55S

Super realistic swimming action which is effective. The weight is set at middle bottom, which stabilize swimming action even at rapid stream. It performs realistic swimming action that shake from left to right when sinking & reeling, which is a great tool for rapid stream.

### HR ROCK MASTER - ROCK CARW **NEW**

Simply collect and start the swimming style, flapping the claws underwater like a shrimp, and the high-frequency fluctuation effect generated by the back of the foot can be achieved simultaneously. Adding chitin and krill to the material enhances its allure, while adding salt to the body increases its density. The streamlined design is more convenient to shuttle through obstacles such as rocks.

Size : 2.4 inch Pcs per pack : 8pcs

### HR VALLEY HUNTER - CHARMING FISH **NEW**

The tail of the CHARMING FISH can have a stable and light swing even in slow forward movements, and can operate in a stable swimming layer, attracting the attention of the target fish with an extremely natural swing. In addition, the gaps designed at the belly can cause the body to collapse during biting, allowing the hook to smoothly penetrate and thereby improving the hooking rate.

Size : 2.6 inch Pcs per pack : 8pcs

Color : 01 White/silver, 02 Pink, 03 Dark brown, 04 Light khaki, 05 Brown green, 06 Brown/silver, 07 Black brown/ red, 08 Blue/silver

### HR VALLEY HUNTER MICRO WORM - FF TAIL

It is made with high quality soft material, making the swimming action vivid, the long tail design make it more agile, with special design the tail shake faster, the glitter powder inside it make it sparkle to catch fish attention.

Size : 1.3 inch Pcs per pack : 10pcs

Code Number : 270100482234-241

### HR VALLEY HUNTER MICRO WORM - TT SHAKE

It is made with high quality soft material, making the swimming action vivid, the spiral design of the body exaggerate the wave it make, the glitter powder inside it make it sparkling to catch fish attention.

Size : 1.9 inch Pcs per pack : 10pcs

Code Number : 270100482226-233

### HR VALLEY HUNTER SPOON VHO

It has special shape, the weight balance is more downward, has big swing and irregular falling action, the golf ball-like dimples on the surface can reduce the wind resistance, and increase the distance of casting.

Code Number : 270100409646-653  
270100485561-584  
270100476670-693

Size : 0.7g · 1.2g · 2g · 3.5g · 5g · 7g · 10g

### HR VALLEY HUNTER SPOON VHF

The wide shape design making it suspend longer when sinking, which increase the chance for fish to bite, and it works well especially at shallow water, and has great effect for fish such as spinibarbus, candidius dace, trout and culter alburnus.

Code Number : 270100426955-7017

Size : 0.7g · 1.2g · 2g · 3.5g · 5g · 7g · 10g

### HR VALLEY HUNTER SPOON

In order to target the carp (Spinibarbus hollandi) in Taiwan, we modify its design to be slim and streamline in shape which increase its capability to dive into the water quickly to reach the target level. No matter to be used in rapid current, gentle current or standing water area, it can always make its best performance!

Code Number : 270100426892-954

Size : 0.7g · 1.2g · 2g · 3.5g · 5g · 7g · 10g

### HR MONSTER GAME II X8 PE LINE

Utilizing Ultra High Molecular Weight Polyethylene Braid. It increased the power requirement in the seas. Using the X8 tight knitting technology, the surface becomes smooth and has low friction which increases durability. Aside from stability, there are literally no extension problems and has increased sensitivity.

### HR ROCK MASTER X4 PE LINE

ROCK MASTER X4 PE LINE series are made of high level Dyneema fiber, which is made in Japan, with lower stretchability and better power performance. The fiber coating with waterproof process is greatly to improve the durability. Weaving craft to a solid round makes casting more stable and smoothly, which could let you enjoy the fun of rock fishing.

### HR VALLEY HUNTER II X8 PE LINE

Eight-strand braided PE thread with smoothness and sensitivity. Made of super-eight-strand weaving technology, it is made by the wire-reinforced process. The fiber is solid and even, achieving ultra-low stretch, showing high tensile performance, smooth surface coating, and improved wear resistance. With smoothness, sensitivity, and ultra-low ductility!

### HR KING LEADER II NYLON LINE

HR KING LEADER II is made of Toray Japan selected material, which makes it to achieve tender but have nice knot strength and with abrasion resistance features. Applied with special treatment to increase the abrasion-resistant and decrease the friction to enhance casting distance. No matter is for ISO fishing, lure fishing or even to fish in the farm, HR KING LEADER II is the perfect match!

### HR GLITTER ASSIST HOOKS FOR MICROJIGGING MJT-10

Micro-metal hooks are made of high-carbon steel to make hooks effective for high strength and high rigidity. Hook tips with high sharpness penetrate through fish immediately when the fish mouth is touched. The design of double hooks in glitter can increase the attraction of MICRO JIGGING and largely increase the hook rate.

### HR VALLEY HUNTER ROCKET JIG HEAD VH-30

Valley hunter rocket jig hook, while dropping into water, it has a plain swim form. While reeling it, if you change your reeling pace, there will be a Z shape swim form. The thin rocket shape design gives it good water cut ability. It can arouse the attack desire and can handle all kinds of targets and situations.

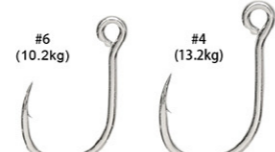

Size : 0.6g · 1.2g · 2.5g · 3.0g Pcs : 5  
Code Number : 210600100106-108

### HR VALLEY HUNTER ENHANCED INLINE SINGLE HOOK VH-21

Freshwater, saltwater hard bait, the hook frame has enhanced design, the hook neck is longer in order to increase the hit rate. The sharp hook tip can penetrate the mouth of a fish. The wide hook design provides more space to hook a fish and reduces the chances of losing it. The strong rust-proof paint can expand the usage time of the hook.

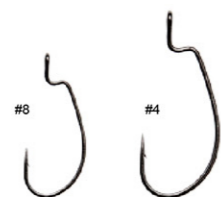

Size : #6 · #4 Pcs : 12  
Code Number : 210600100121-122

### HR VALLEY HUNTER WORM HOOK VH-10

Crank hook dedicated for soft worm, applicable with VALLEY HUNTER JIG HEAD. Crank hook designed for applying with VALLEY HUNTER soft worm, with bigger eyelet it's more applicable with variety of rigs, and it's more natural in the water, also with strong penetrability and high usability, it's suitable for any kind of environment.

Size : #8 · #6 · #4 Pcs : 12  
Code Number : 210600100106-108

### HR VALLEY HUNTER JIG HEAD II

Through the buckle, you can handle different water levels. The hook has a fast clip design which allows you to change the hook no matter what type of hook. You just have attached it with ease. On the bottom of the lead, there is a ring that allows you to increase hooks in order to raise the hitting rate or add glitters to attract fish.

Size : 0.6g · 1.2g · 3.0g · 5.0g · 7.0g Pcs : 8  
Code Number : 270100710141-145

### HR LIGHT FISH GRIP HFG-2702

Lightweight small fish grip, the main material is made of lightweight and rust-free reinforced fiber plastic. In addition, it also comes with a carabiner, which can be hung on fishing vests, belt rings, bags and other places. Lock-type fish grip design, push the control lever to open the fish clip; Squeeze the control lever to close the opening of the fish grip, and you can firmly grasp the fish mouth.

NEW

Length : 125MM  
Material : Plastic fiber

Code Number : 270100656531-334

### HR FISH GRIP HFG-2701

With a sturdy structure featuring a stainless steel body, which is durable to use for long time, while protecting against the corrosive effects of sea water. The grappling hook employs a stainless steel spring-loaded mechanism to securely grasp catches. The non-slip rubber handle, along with the safety rope, effectively prevents the fish clamp from slipping. It's easy to use, simply press the triggers on both sides to open the clamp.

Hook Opening : Up to 2CM  
Length : 18 CM  
Item Weight : 126g  
Materials : Stainless Steel, Rubber  
Code Number : 270100656419-20

### HR TITANIUM COLOR PE SMALL SCISSORS PS-2701

HR TITANIUM COLOR PE SMALL SCISSORS, made of powerful steel and aluminum alloy. The serration blade can cut the PE line easily. The thoughtful buckle ring design allows you to hang your leash or hang it in the obvious spots to prevent loss. The blade has a colorful titanium design, which will upgrade the scissors.

Size : 9.5 cm x 6 cm Code Number : 270100657134

### HR FISHING PLIERS FP-2702

Pliers cap has titanium painting processed with stainless steel. Pliers tip has a ring-opening design, makes it easier to detach the lure ring. The zigzag scissors design makes it easy to cut the PE line. Ergonomically designed plastic grip is designed after the diamond cutting technology. The grip has a hole for a rope for attaching the insurance rope.

Size : 16 x 5.3 x 1.2 cm  
Weight : 85g  
Suitable lure ring : #1 ~ #6  
Code Number : 270100601731

### HR FISHING PLIERS FP-2701

Pliers cap has titanium painting processed with stainless steel. Pliers tip has a ring-opening design, makes it easier to detach the lure ring. The zigzag scissors design makes it easy to cut the PE line. Ergonomically designed plastic grip is designed after the diamond cutting technology. The grip has a hole for a rope for attaching the insurance rope.

Size : 18.8 x 5.8 x 1.5 cm  
Weight : 140g  
Suitable lure ring : #4 ~ #12  
Code Number : 270100601730

### HR DOUBLE PLIERS HOLDER HPH-2701
